

Notice of Web Portal Testing

As noted in the draft RFP and illustrated at the June 19th Bidders' Conference, ESI plans to utilize a web-based "RFP Web Portal" to solicit registration and proposal information from Bidders in response to the Summer 2008 RFP. To ensure potential Bidders are provided the opportunity to test the system in advance of the formal solicitation process, ESI is making its RFP Web Portal available for limited testing of the Bidder Registration and Proposal Submission Processes. ESI will conduct the testing in two distinct phases. During the first phase, ESI invites potential Bidders to test the Bidder Registration Process and submit comments or questions beginning Tuesday, July 1st through Thursday, July 3rd. During the second phase, ESI invites potential Bidders who registered during the first phase to test the Proposal Submission Process and submit comments or questions over the period July 8th through July 10th. ESI requests that all comments regarding any testing of the RFP Web Portal during the two phases outlined above be directed to the [RFP Administrator](#).
